

Key investor information

This document provides you with key investor information about this UCITS. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this UCITS. You are advised to read it so you can make an informed decision about whether to invest.

**SEVEN UCITS – SEVEN FORCE 2,
a sub-fund of SEVEN UCITS
Class: EUR-R, (Accumulation) LU2109939160**

This UCITS is managed by SEVEN CAPITAL MANAGEMENT

Objectives and investment policy

Management objective: the SEVEN UCITS – FORCE 2 sub-fund is actively managed with reference to the daily capitalised €STR index. It aims to obtain an annual performance, after the deduction of operating and management fees, exceeding that of its benchmark index. The benchmark is only used to compare performance, with no limits regarding the portfolio's composition. The sub-fund's strategy is to build a portfolio of diversified assets, without geographic restrictions. The sub-fund may invest between 0 and 30% of its net assets in equity markets and 0 to 100% in bond markets. This is a long-only sub-fund and net exposure to equity and bond markets may be zero during the bearish phases of these markets. To achieve its management objective, the sub-fund will primarily invest in equities and interest rate products, mainly via derivatives and securities. It may also invest up to 10% of its net assets in units/shares of UCITS. The uninvested portion will be placed in money-market instruments (such as negotiable debt securities). The management company uses an algorithm to manage the sub-fund's investments. The use of this algorithm does not guarantee the achievement of the management objective and may lead to specific risks for the sub-fund (cyber risk, talent risk, strategic risk and regulatory risk, among others). These risks are detailed in the SEVEN UCITS prospectus. The algorithm used influences the management process applied by the management company with regard to the buy and sell signals for the products in the portfolio. These signals are based on price momentum, risk momentum and momentum determined by fundamental indicators.

The investment process consists of two steps:

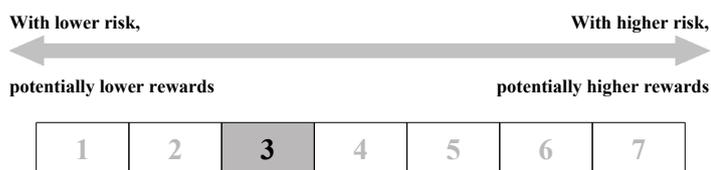

1. Allocation: this step provides the desired maximum exposure per asset class. The allocation may change over time depending on opportunities.
2. Daily indication: this step indicates the direction of the position. The final market position is the aggregation of several signals based on the momentum of price, risk and macroeconomic indicators.

The investment process involves filtering out securities based on their ESG rating and applying a best-in-class approach by excluding the 20% of issuers with the lowest rating and issuers with a level 5 controversy score, as set out in point III.1.b.

Except in exceptional cases, historical volatility must remain within a range of 1% to 4%. The net asset value of the sub-fund is expressed in EUR.

The net income of this sub-fund is fully accumulated for the share class EUR-R (Acc); the recommended investment period is 3 years. Subscriptions and redemptions are cleared daily until 12 noon at CACEIS Bank, Luxembourg Branch, and are executed on the basis of the next net asset value (daily net asset value).

Risk and reward profile

Why is the UCITS classified as category III:

Risk category 3 reflects a potential for limited gains and/or losses in the value of the portfolio. This is due to investments in equities and interest rate instruments made on the market without geographical restriction.

Historical data, such as that used to calculate the synthetic indicator, cannot be considered as a reliable indication of the future risk profile of the UCITS.

The risk category associated with this UCITS is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the UCITS not taken into account in this indicator include the following:

Concentration risk: To the extent that the sub-fund concentrates its investments in a country, market, industry or asset class, it might incur a capital loss following adverse events specifically affecting that country, market, industry or asset class.

Credit and interest rate risk related to investments in bonds: By investing in bonds, money-market securities or other debt securities, the sub-fund is at risk of issuer default. The likelihood of such an event depends on the quality of the issuer. An interest rate increase may lead to a decrease in the value of fixed-income securities held by the sub-fund. Given that the price and yield of a bond vary inversely, a fall in the bond's price will be accompanied by an increase in its yield.

Liquidity risk: a liquidity risk exists when specific investments are difficult to sell or buy. This could reduce the sub-fund's returns if it is unable to enter into transactions under favourable conditions. This can result from events of unprecedented intensity and severity, such as pandemics or natural disasters.

Risk associated with the use of derivatives: The sub-fund may use derivatives, i.e. financial instruments whose value depends on that of an underlying asset. However, even minor fluctuations in the price of the underlying asset may lead to significant changes in the price of the corresponding derivative. The use of over-the-counter derivatives exposes the sub-fund to a risk that the counterparty may fully or partially fail to honour its contractual obligations. This could result in a financial loss for the sub-fund.

Investment in other UCIs/UCITS: A Fund that invests in other undertakings for collective investment will not have an active role in the daily management of the undertaking for collective investment in which it invests. In addition, a Fund will generally not have the opportunity to assess the specific investments made by the underlying undertakings for collective investment before they are made. As a result, a Fund's returns will depend on the performance of the managers of the underlying funds and may be adversely affected by unfavourable performance.

Charges

The charges and commissions are used to cover the operating costs of the UCITS, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None
The percentage shown is the maximum amount that can be paid out of your investment. You may find out the actual entry charges from your financial advisor or distributor.	
Charges taken from the UCITS over one year	
Ongoing charges	1.29%
Charges taken from the UCITS under certain conditions	
Performance charge	No performance fee for the previous year.
10% of the outperformance of the class compared to the reference rate (?STR) with a minimum of 0%	

The entry charges shown are maximum rates. In certain cases, the charges paid may be lower.

Ongoing charges are estimated on the basis of the expected total amount of charges for the first financial year. This percentage may vary from year to year. It excludes performance and intermediary fees, except for the entry and exit charges paid by the Fund when buying or selling units of another Fund.

The use of the management algorithm does not entail any charges for the sub-fund.

For more information about the charges of the UCITS, please refer to the section entitled “Charges and fees” of the prospectus, available online at www.seven-cm.com.

Past performance

Useful information on past performance will be available at the end of the first financial year.

The performance figures shown in the bar chart are not a reliable indication of future performance.

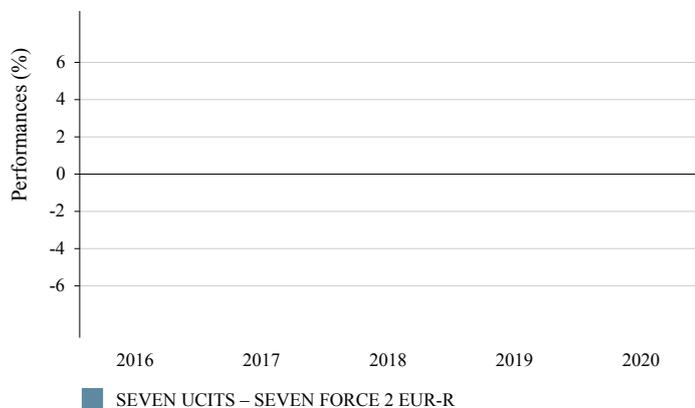

There is insufficient data to provide a useful indication of past performance to investors.

Date of creation of the UCITS: 20 May 2020

Date of creation of the share class: 20 May 2020

Base currency: Euro

Benchmark: Capitalised €STR.

Practical information

Depository: CACEIS Bank, Luxembourg Branch

Where and how to obtain further information about the UCITS (prospectus/annual report/semi-annual report): Shareholders can obtain more information about the UCITS by sending a written request to: Seven Capital Management, 39 Rue Marbeuf, 75008 Paris, France.

This key investor information document describes a sub-fund of the SEVEN UCITS. The UCITS is composed of other sub-funds.

You can find more information on these sub-funds in the UCITS’ prospectus or on the website www.seven-cm.com.

Taxation: Depending on your tax regime, any capital gains and income arising from the ownership of shares in the UCITS may be subject to taxation. We recommend that you seek advice on this matter from the distributor of the UCITS.

The tax legislation of the member state in which the UCITS originates may affect the investor’s personal tax situation.
